

FOUR LAYER TANKS

- Inner Layer Food Grade Polymers
- Insulated Middle Layer
- Premier Black Colour Layer
- Outer Premier Green Colour Layer

CYLINDRICAL VERTICAL WATER TANKS

CAPACITY LITERS	DIA IN MM.	HEIGHT IN MM.	MANHOLE IN MM.
1000	1130	1140	410
1500	1360	1230	410
2000	1360	1670	410
2000	1510	1370	410
3000	1690	1630	410
5000	2120	1620	410

When it comes to manufacturing Water Tanks, SUPER from Baroda Polyform Pvt. Ltd. matches scales with international names. In order to deliver the best quality products, Baroda Polyform Pvt. Ltd. imports *LLDPE resin with high density and low melt flow. This resin has high level of ESCR (Environmental Stress Crack Resistance).

Baroda Polyform Pvt. Ltd. manufactures water tanks made from PE (Polyethylene) as raw material, which is widely known for its high strength, stiffness, rigidity and resistance to corrosion and no stress during processing. The Company offers a wide range of chemical tanks that are moulded from high grade of PE, and an awe-inspiring range of products and services, which are sure to leave you spellbound.

* For specific sizes

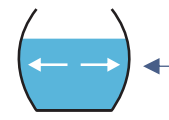

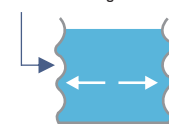

FOOD GRADE Safe for use when in contact with drinking water, SUPER tanks are manufactured from food grade polyethylene.

UV STABLE UV Stabilization prevents degradation and ensures that there is no cracking or chalking or loss is physical properties in SUPER tanks.

ANTI BACTERIAL TANK

Extra ribs for extra strength

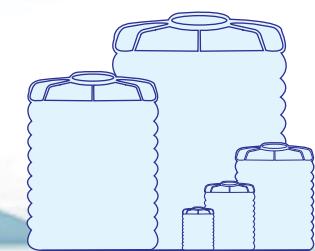

Other tanks bulge due to lack of ribs

Air tight threaded lid

SUPER ULTRA WATER TANK

A Super solution to your storage problem

Innovation Flexibility Reliability
